

COBALT 12 GUARD

CONTROLLED RELEASE COBALT PELLET

A SLOW RELEASE SUPPLEMENTATION OF COBALT AND VITAMIN B12 FOR THE DIET OF LAMBS AND EWES. PELLETS ARE SIMPLY ADMINISTERED WITH A NORMAL 10ML DOSING GUN, PLACE EACH PELLET INSIDE ENCLOSED RUBBER APPLICATOR (WHICH IS AFFIXED TO THE TOP OF DOSING GUN) AND DRENCH AS NORMAL, JUST INSERT NEW PELLET TO ATTACHMENT EACH TIME. SEE WEB PAGE VIDEO FOR INSTRUCTIONS AND EASE OF USE.

COBALT 12 GUARD WAS DEVELOPED IN RESPONSE TO MANY ENQUIRES FROM LAMB PRODUCERS WHO WERE DISSATISFIED FROM THE RESULTS AND FREQUENCY OF ADMINISTRATION FROM USING ORAL COBALT DRENCHES. COBALT 12 GUARD RELEASES IT'S COBALT AND VITAMIN B12 CONTENT SLOWLY IN THE LAMBS RUMEN OVER SEVERAL WEEKS AND GIVES EFFECTIVE SUPPLEMENTATION FOR UP TO 60 DAYS. IDEAL FOR LAMBS AT WEANING AND AS AN ALTERNATIVE TO ORAL DRENCHING.

CONTENTS PER PELLET: 213MG COBALT ACETATE, 1.4 MG SODIUM SELENITE, 500 MCG VITAMIN B12. FAR SUPERIOR THAN ORAL DRENCHING AND AN EFFECTIVE ALTERNATIVE TO B12 INJECTIONS, COBALT 12 GUARD IS SIMPLE TO ADMINISTER AND MOST ECONOMICAL. EACH PACK CONTAINS 250 PELLETS, DOSE 1 PELLET FOR LAMBS, WEANED LAMBS OR STORE LAMBS. 2 PELLETS FOR EWES 6 - 8 WEEKS PRIOR TO LAMBING AND BEFORE FLUSHING.
